KUNJ LUNAGARIYA

Surat,Gujarat kunjlunagariya@gmail.com Kunj Lunagariya kunj2210

ABOUT ME

An Information Technology (IT) student with expertise in **Data Analytics and Software Development**. Experienced in developing real-world applications and solving complex problems by analyzing the problem and generating the insights. Also has a strong background in competitive coding and hackathons. Passionate about leveraging technology for impactful and innovative advancements.

TECHNICAL SKILLS

Programming : Java, JavaScript, C/C++, python

Libraries : Pandas, Numpy, Scikit-Learn, Matplotlib, Seaborn, PyTorch, TensorFlow

Frameworks: React.js , Node.js

Web Technologies: MERN Stack (MongoDB, Express, React, Node.js), HTML, CSS

Technologies: Version control of Git & GitHub ,UI/UX Design Principles

Tools and Database : MongoDB Atlas , MySQL , Git/Github, Jupyter Notebooks, Tableau, PowerBI, Figma

PROJECTS

AI Powered Recipe Generator

Technologies: JavaScript (React), Node.js / Express, MongoDB, Python microservices, MERN stack, Tailwind CSS, JWT, t5-small (fine-tuned with QLoRA), TF-IDF / Cosine Similarity, Jaccard, Kaggle RecipeNLG dataset, JSON.

- Full-stack, dual-engine recipe application built with the MERN stack and Python microservices to separate retrieval and generative responsibilities.
- Hybrid AI architecture:
  - Retrieval engine using Jaccard and TF-IDF/Cosine Similarity to precisely match user ingredients against the Kaggle RecipeNLG dataset.
  - Generative engine powered by a locally fine-tuned t5-small Transformer using QLoRA for low-latency, on-device recipe generation.
- Delivered blended retrieval+generation workflows so users get accurate, ingredient-matched recipes with polished, step-by-step AI-written instructions.
- Responsive React frontend styled with Tailwind CSS, featuring dark mode and animated interactions for a modern UX.
- Secure JWT authentication and optimized MongoDB queries to ensure fast, scalable performance for single-device deployments.
- Ideal for offline/low-latency use cases where local inference and efficient retrieval are required.

Real-Time Weather Forecast Application

Technologies: Html,CSS ,React.js,JSON,Express.js,MongoDB,OpenWeatherMap API

- Developed a web-based application to display current weather conditions, forecasts, and location specific data.
- Integrated OpenWeatherMap API for dynamic weather updates and implemented a user-friendly interface.

PROFESSIONAL EXPERIENCE

Full Stack Developer INTERN | Hopiant | June 2025

- Here, I learned to design and develop Shopify web stores and create user interface designs using tools like Figma.

- Also Gained hands-on experience in building responsive layouts and implementing functional e-commerce features.
- Enhanced professional communication abilities by interacting with clients to gather requirements, align on project goals, share regular updates, and handle feedback efficiently to deliver successful results.

EDUCATION

Charotar University Of Science And Technology
B.Tech , Information Technology — *July 2023 - June 2027*

- CGPA : 8.47 (Till Jan 2026)

Ashadeep International School
H.S.C , G.S.E.B — *June 2021 - Mar 2023*

- PR : 88.0

Gajera International School
S.S.C , G.S.E.B — *May 2021*

- Percentage : 85.0%

ACHIEVEMENTS

- **2x NPTEL Certified**
  - Data Structure and Algorithm using JAVA
  - Database Management System

- **MongoDB Certified** (Node.js Developer Path)
